Test discription Open en close door with large hinges over 180 degrees
 No aging on Guard applied before testing
 Mounting conform attached instruction

door open position

closed position

top view in open position at 180°

Results : The mounting tape kept the door finger guard on the door and frame.
 During the 250.000 cycles the guard hasn't shown any wear on the mounting
 Connection between the 2 sides, rivets still intact after 250.000 cycles
 No wear on the Guard itself.
